

Red Vs Blue Gear Reconstruction

Why did the hacker always excel at reverse engineering?
Because the hacker had a knack for "gear-ing" up his counterfeiting skills!

Red team Gear & **Blue** Team Gear

In this problem you will be the red team. You need to find the fastest way of reconstructing the object from the provided dataset. (attached zip file)

Be sure to thoroughly check all files and carefully examine the full dataset as a hacker would.

Each team is required to submit a zip folder titled “Team_Name_Submission” containing a final report detailing the process they took to uncover the solution as well as a CAD file (of any format) of the final reconstruction that was produced by the team.

Please submit your submissions to this link [here](#)

Top 6 Teams will be announced October 10th via email and [Linkedin](#)
